Seconded by Mr. T. Ehimra Rao and carried.

Mr. T. The Board resolved respectfully to solicit the Government to kindly allow the free grant of timber required for the building.

1. Read again Resolution 3 of the proceedings of the Municipal Board meeting convened on the 29th November 1887, in which they had proposed the further discussion of the project for the construction of a drain from the Pandina Agasara Keri and Debangidargada Bedar Keri until they should have had the benefit of a personal conference with the President.

The President explained that the proposed drain had nothing to do with the general drainage scheme. What was urgently wanted was to adopt some means for removing the damp in the houses in this quarter of the town, which had been found to be the main cause of the sickness prevailing among the people living there. The Vice-President explained that traces of an old drain were to be found and that the President's scheme to lead the drain into the fort ditch near Hanumantaraya's temple was perfectly practicable. After some further discussion regarding the great benefit likely to accrue to the people from carrying out this project, the meeting unanimously resolved that the project in question be passed and the work be undertaken along with those passed at the last meeting, as soon as possible, in anticipation of Government sanction.

2. Read accounts of receipts and expenditures for the month of November 1887.

It is observed that the realizations under Octroi amounted to Rs. 140—9—11 in the month as contrasted with Rs. 316—14—8 in November 1886, showing a decrease of Rs. 176—14—9, which is attributed to the falling off in imports on account of the existence of cholera in Shimoga.

The expenditures of the month show an increase of Rs. 713—10—5 as compared with the amount charged in November 1886, mainly on account of the work of metalling of Petta street and Kollurayanakeri street now under progress.

Resolved that the accounts be passed.
